

Where should my paper go?

Newspapers

along with **magazines**, **catalogs**, and inserts go in a brown paper grocery bag

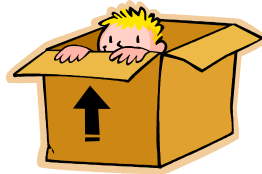

then go in the newspaper cart, barrel, newspaper dumpster or blue box at your condominium, or in the blue recycling box if the Town picks up your recyclables.

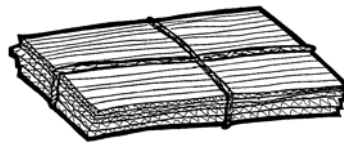

These days the newspaper goes to West Haven to be baled, then all of it goes to Mainland China!

Corrugated Cardboard

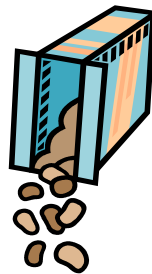

(but empty!)

gets flattened

and put next to your recycling container or if the Town picks up your recyclables, then save it for large cardboard day and then you don't even have to flatten it! (still must be empty, though)

Trash

But flat cardboard, "boxboard", construction paper, paper towels, tissues and the like still get thrown "away" with the trash.

Office Paper

recycling is optional for residents but must be recycled by businesses.

For residents we can't collect it at the curb (don't want it wet!) but you may, and are encouraged to, drop it off at the transfer station because

We've Just Expanded What We Can Take!

We've always taken **white paper** dropped off at the transfer station because it's on the state list of mandatory recyclables. But we also take **colored paper**, **envelopes** even with windows, and now, starting 11/1/05, **glossy paper**, as long as it's not a magazine or catalog, so most of the other junk mail can be dropped off for recycling with office paper. Sorting just got easier, too: don't worry about paper clips, staples, Post-it® notes, or rubber bands! For complete details, check our web site at www.Branford-CT.gov

So where does the trash go, anyway?

It goes to the Bristol Resource Recovery Facility to be burned to make electricity. That's one reason why you shouldn't put things in the garbage like metal, glass, wallboard, or household hazardous wastes.
